

After a fun day at play, Squirt is unexpectedly devastated. Her favorite necklace is missing! Time for her big brother and his "Detective Team" to crack the case.

"This is an engaging story for young detectives, itching to unravel a mystery!"

I LOVE all the pages included at the back of the book, and kids will too!

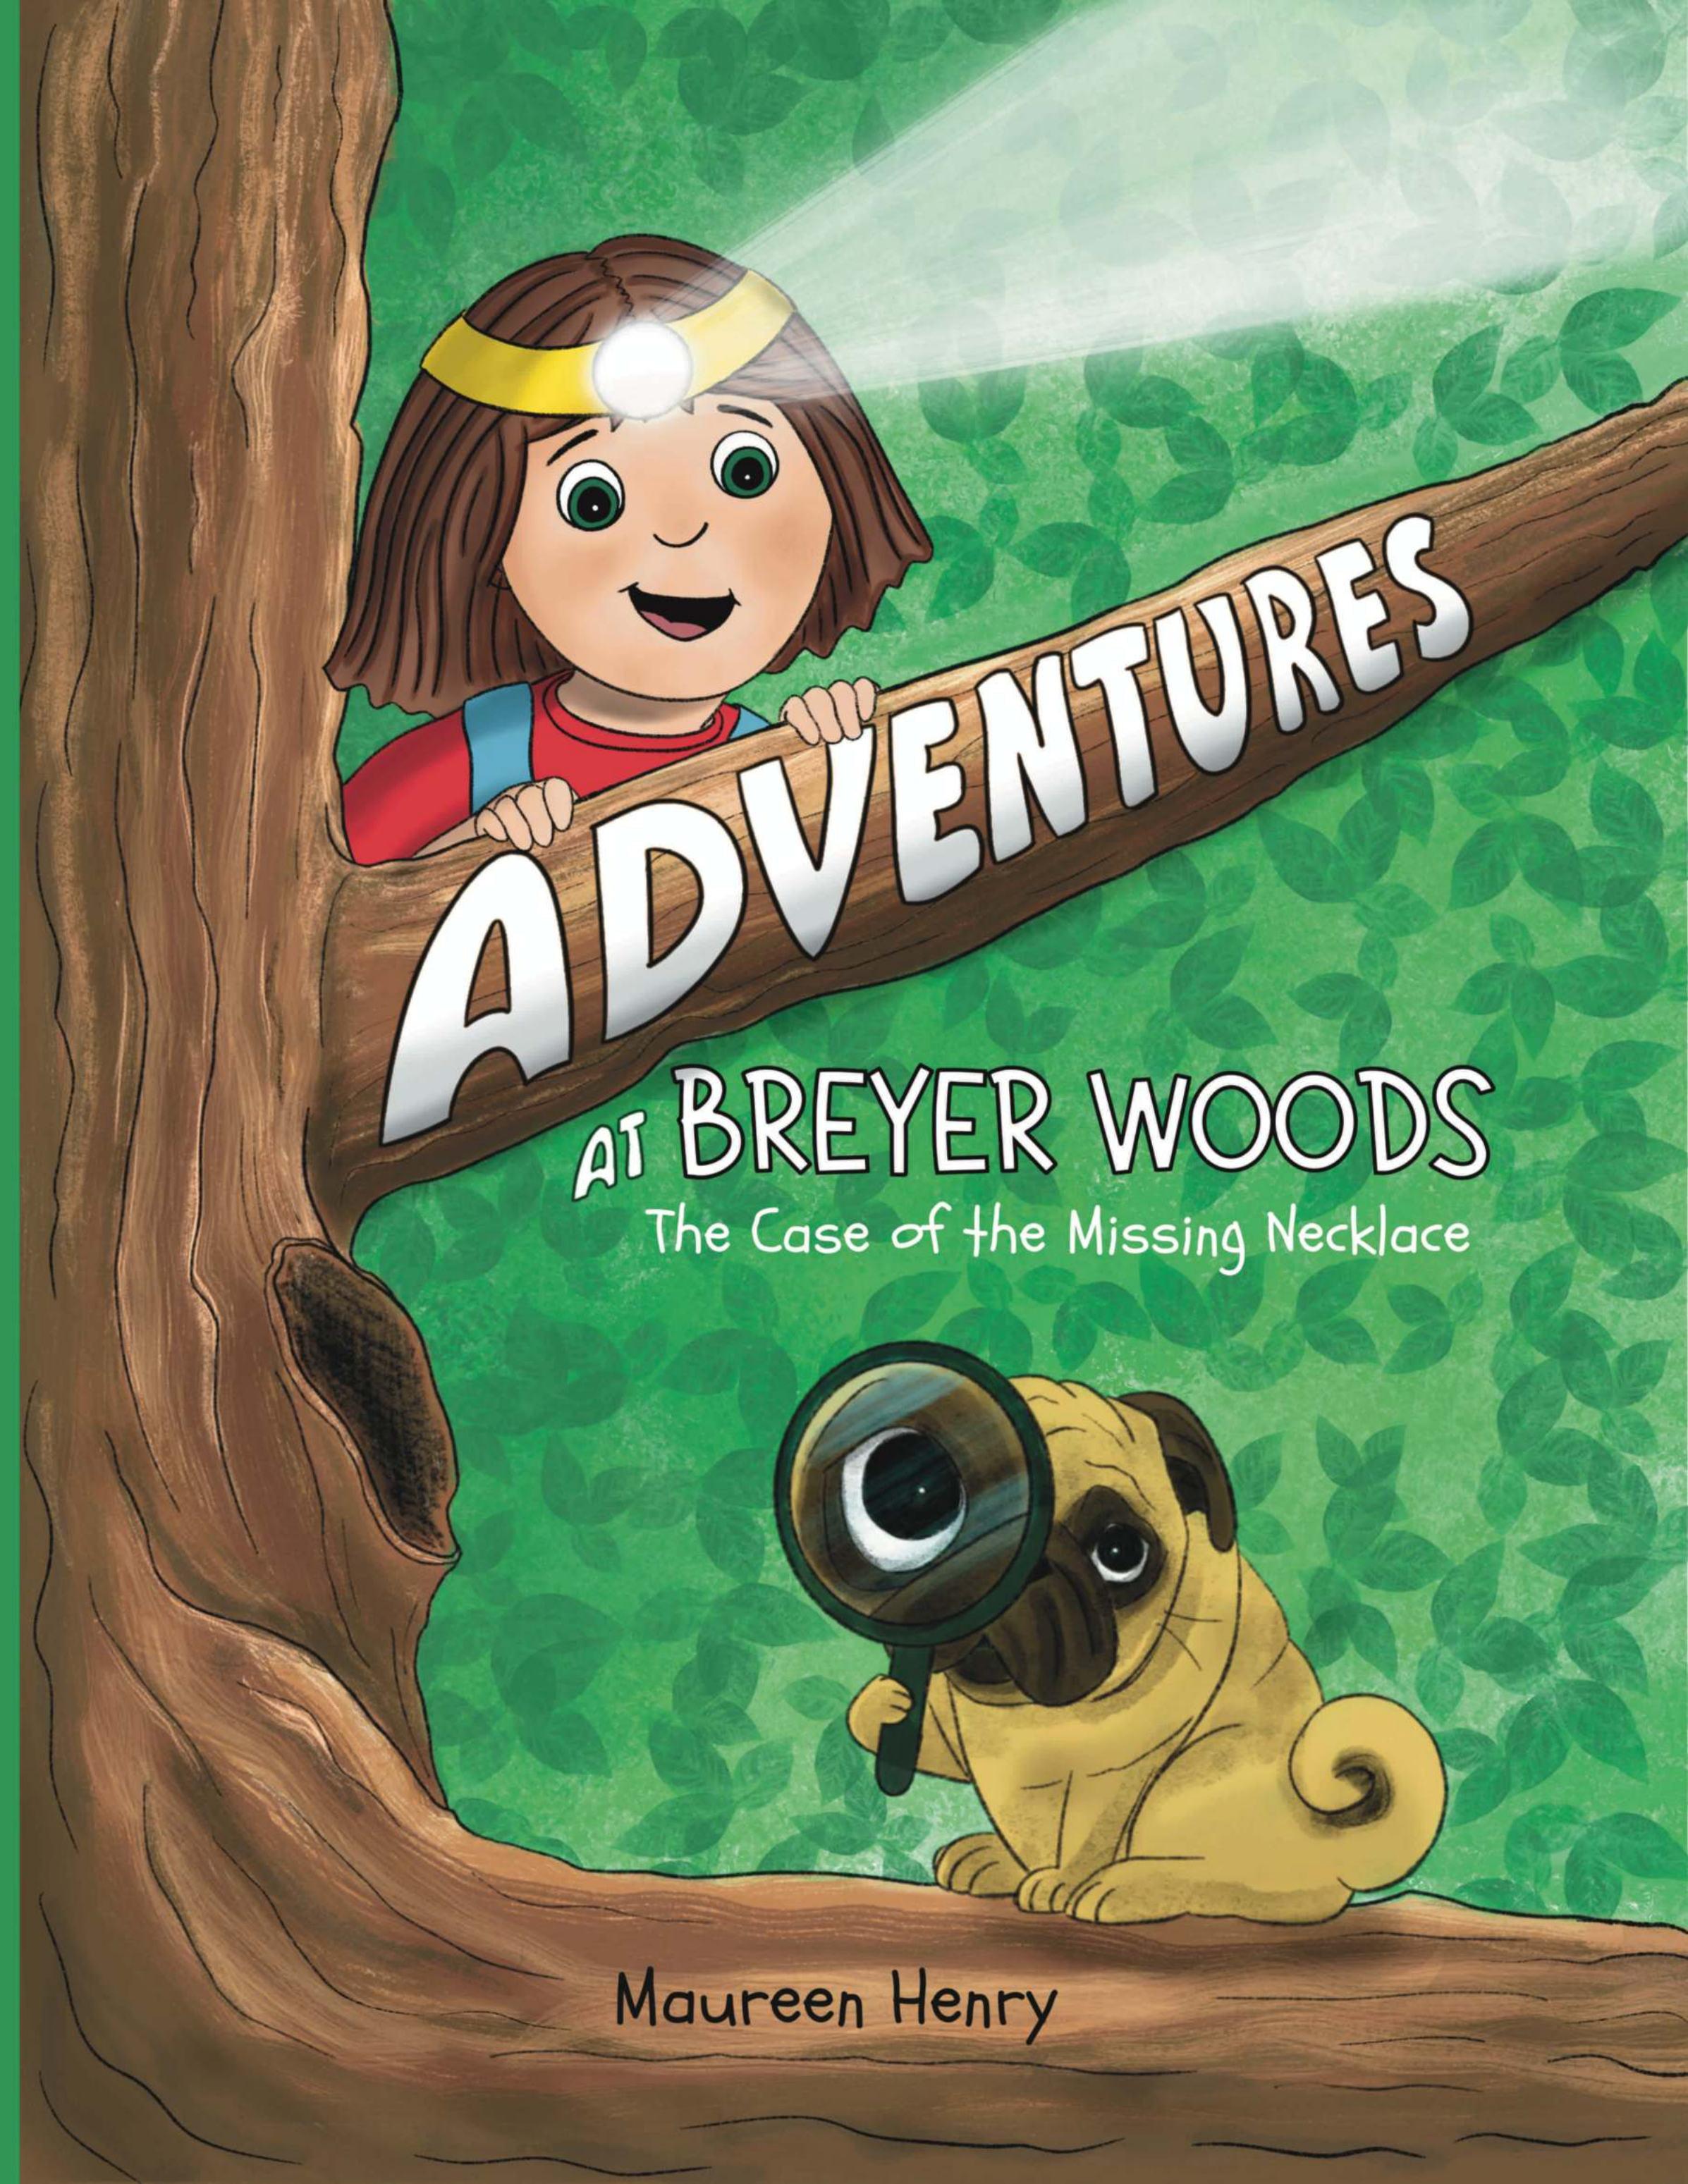

From a book designers perspective, the maps, and the compass & chain being used as a decorative element are wonderful, I even love the font choices made for the back pages.

As a fellow author/illustrator, I love the included bios for each of the characters.

The addition of actual photos is priceless, adding authenticity to the entire book.

The final letter to the reader is refreshingly personal and spot-on! Little sleuths will love this!"
